Emergency Alerts

We care about your safety.

Emergencies can happen at any time and its important for us to stay connected.

In the event of an emergency we need to ensure we can contact you. Apple Emergency Alerts allows us to rapidly notify and check on employees should an emergency occur. Global Security will use Apple Emergency Alerts to notify those affected and to conduct post emergency welfare checks

In order to ensure that you receive emergency messages, you need to make sure your current contact information is in Apple Emergency Alerts. Here's what you need to do:

Receive Alerts

- Sign in to Apple Directory, and click My Info in the sidebar.
- In the left sidebar, under My Info, select Contact Information.
- Under Phone Numbers, click the green plus (+) sign, and select "mobile for alerts" from the menu.
- Select your country and add your phone number.
- Click Save.

Read Terms and Conditions and Accept or Decline.
Your emergency mobile phone number will not be visible in Apple Directory and will only be used if Apple needs to alert you to an emergency situation regarding your safety or to conduct post emergency welfare checks.
As an example, we will use the system in the event of a fire, earthquake, or bomb threat.
Thank You!
